SOFTWARE ENGINEER

Software engineer with an emphasis in front-end development; specifically React. Possesses strong skills in team leading and management as well as design. Focused on helping companies create the best front-end user experience possible.

TECHNICAL SKILLS

JavaScript, React, Ruby, Rails, SQL, HTML, CSS

TECHNICAL PROJECTS

Remind Me - [Github](#)

Full-stack web application for creating and storing personal reminders/essential dates.

- Built on a Ruby on Rails backend including custom routing
- Built on a React front end with CSS and MaterialUI for a beautifully rendered, easy-to-use application
- Utilized a RESTful API to store and retrieve customer data based on actions

Alchemy Tattoos - [Github](#)

Full-stack web application created to allow users to select and favorite images from an extensive curated collection of tattoos.

- Used Ruby on Rails to setup backend functionality
- Built a React with CSS frontend for a beautiful customer experience
- Utilized a RESTful API for user data management and experience

Blaque Coffee Co. - [Front-end](#) | [Back-end](#)

Build a functional coffee e-comm store.

- Used Ruby on Rails to handle backend functionality
- Built on React frontend
- Self-built backend API of coffees available for customer purchase

EXPERIENCE

Brand New Box

New York, NY

Full-Stack Software Engineer

2022 - 2023

- Actively applied object-oriented programming and best coding practices to drive the success of various Ruby on Rails development projects
- Collaborated within a 12-person team to construct and enhance functionality across a diverse range of client projects
- Attained a deep understanding of application structuring, development and testing principles

Gregorys Coffee

New York, NY

Director of Commissary Operations

2011 - 2022

- Provided strategic leadership, direction, and day-to-day coordination of facility operations, food, and beverage prep, and coffee roasting
- Fostered collaboration with vendors, the internal bakery team, and Store Leaders of 30+ locations to ensure the maintenance of inventory levels and budgets
- Established and closely monitored all management, production, and distribution schedules while adhering to budgetary constraints
- Orchestrated and ensured the timely production and overnight delivery of products to supply 30+ locations
- Collaborated weekly with the CEO and COO to optimize business operations
- Managed all aspects of online order fulfillment and customer service, handling approximately 85 orders per week
